

The Uni-Cup Pig® is used where more flexibility is required such as pipelines with varying wall thickness, low flow or low pressure applications. The cups design provides a good flexible seal.

It is very effective in removing liquids from wet gas systems, water from product pipelines and product separation and evacuation.

APPLICATIONS

- Liquid removal
- Product separation in refined product pipelines
- Wax control in crude oil lines
- Will traverse and seal in 90°, & 180°, 1.5 R bends, dented and out-of-round pipe
- The cup design permits smooth transition with full wall seal through tees and full port valves

FEATURES AND BENEFITS

- Single piece polyurethane construction; no assembly or replacement parts necessary
- Manufactured from high performance polyurethane
- Engineered for longer wear and better abrasion resistance
- Excellent physical and chemical resistance properties
- Various durometers available
- Transmitter housing available for tracking lost or stuck pigs
- Bolt-on wire brushes available for more aggressive applications
