

## DESCRIPTION

Everything about Inline's ISTE Pig<sup>®</sup> is designed with extreme duty in mind. The tough, replaceable cups and discs are made exclusively of hard wearing Maxithane<sup>®</sup>. Inline's proprietary system of custom urethane compounds formulated for severe pipeline conditions that destroy standard "off-the-shelf" urethane.

The ISTE Pig<sup>®</sup> uses the patented, long-wearing DC<sup>®</sup> Cup to provide the pipeline operator with the edge for long-distance runs. The DC<sup>®</sup> Cup's hefty load-bearing capacity makes it possible to support even the heaviest of metal-mandrel pigs without the "nose-diving" effect common in standard cups.

For extra scraping, the ISTE Pig<sup>®</sup> uses heavy duty flat wire HZ brushes that are mounted on spring-loaded arms to ensure constant contact with the pipe wall.

INTELLIGENT PIPELINE CLEANING  
CORROSION CONTROL • DEWATERING • PIT CLEANING
