

PRODUCT INFORMATION

DC Cups™ are designed for maximum scraping. They are ideal for removing paraffin, asphaltines, black powder and other substances that adhere to the pipe wall.

Superior load bearing and sealing characteristics make them ideal for removing liquids from pipelines and separating dissimilar products.

The design of the DC Cup™ surface bearing area and the flex area provides maximum wear resistance.

- The differential pressure of the product over the pig forces the scraping edge against the pipe wall for maximum cleaning
- The DC Cup™ is designed to support the heavy design of mandrel pigs and inline inspection tools.
- DC Cups™ are manufactured from MAXITHANE™, Inline's proprietary system of custom urethane compounds formulated for severe pipeline conditions that destroy off the shelf urethane
- DC Cups™ can be supplied to fit all mandrel pig designs

HZ DC Cup Pig

INTELLIGENT PIPELINE CLEANING
corrosion control • dewatering • pit cleaning
