

The Uni-Plus Pig[®] combines sealing and scraping capabilities in one cleaning pig. Its solid one piece construction and the unique cup disc combination provides the best possible combination for cleaning efficiency. The cup shape allows the pig to run long distances yet maintain a good seal, even through parts of the pipeline that are out-of round. The discs provide the most effective design to remove or scrape foreign material from the pipe walls.

Where hardened deposits are encountered the Uni-Plus Pig[®] is available with circular steel scraping brushes. The brushes are made of tempered steel to remove hardened deposits.

The Uni-Plus Pig[®] is manufactured from high performance polyurethane to ensure durability

APPLICATIONS

- ▣ Batching dissimilar products
- ▣ Paraffin removal from crude oil systems
- ▣ Liquid removal from wet gas systems
- ▣ Black powder from natural gas lines
- ▣ Product evacuation and separation
