

The solid polyurethane Uni-Flex Pig® is cast as a single piece construction. The flexible combination of cup and discs creates an effective pig for removing liquids from wet gas systems, water from product pipelines, and paraffin from the walls of crude oil pipelines.

Manufactured from high-performance polyurethane, it flexes through varying diameter pipelines, short-radius weld ells, tees, valves, dents and out-of-round pipe. Its hollow core allows the pig to expand in diameter thereby increasing its seal as the differential pressure across the pig increases and to center itself for even wear.

Available for Pipe Sizes 2" through 20"

APPLICATIONS

- Condensate and Liquids from Wet Gas Pipelines
- Water from Product Pipelines
- Ideal for LPG Services
- Controlling Paraffin in Crude Oil Pipelines

FEATURES AND BENEFITS

- Available in Standard & High-Performance Polyurethane
- Single Piece Construction
- Available with Pull Ropes, Cables and Nylon Straps
- Can be Configured for Multi-Diameters
- Available with Transmitter Cavity
